User Stories

First Functionality

As a JabRef user, I want to be able to analyse the provided Google Scholar profile so I can better judge if this profile has suitable information for my own article.
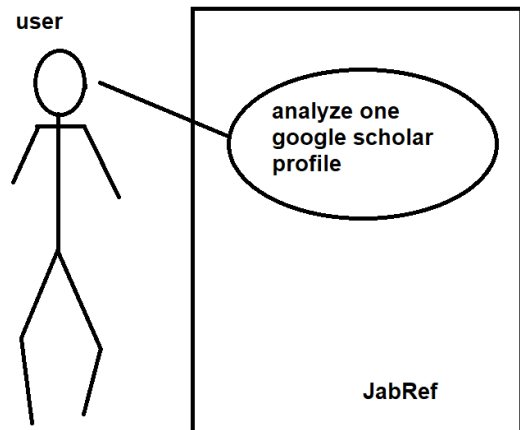

Use Case Diagrams:

Use Case "Analyse a Google Scholar profile":

      Primary actor: User

      Secondary actor(s): None

      Description: the user can analyze the provided Google Scholar profile so they can better judge if it has suitable information for his own article.

Second Functionality

As a JabRef user, I want to be able to compare two Google Scholar profiles so I can find new profiles and articles that would be valuable for my own article.

Use Case Diagrams:

Use Case "Compare two Google Scholar profiles":

      Primary actor: User

      Secondary actor(s): None

      Description: the user can compare profiles that are useful for their research. Said comparison will yield articles and profiles that may be helpful.
